Weighted Multi-Variable Analysis

Growth Map delivers hyperlocal growth analysis based upon multiple variables

- ◆ Uncover differences between metro market data and more concealed variations in growth from the Census Block Groups
- ◆ **Finest GRANULARITY:** Reliable data for each Block Group Level containing 600-1,000 households each
- ◆ **TIMELY DATA:** Quarterly and monthly updates for specified datasets within fixed boundaries.
- ◆ **INSTANTLY FILTER** to find optimal markets within your selected radius.
- ◆ **MULTI-VARIABLE Analysis:** Playbooks can incorporate multiple geographic markets and multiple datasets.
